Lester Snow  
Executive Director CALFED  
1416 Ninth Street, Suite 1155  
Sacramento, CA 95814

Dear Mr. Snow:

Please enter the following comments in the record concerning the CALFED Bay/Delta plan.

The adopted plan should not rely on new dams or reservoirs. It should concentrate on using water more efficiently through conservation, recycling, groundwater storage, and watershed restoration.

The adopted plan should also remove barrier dams, increase stream flows and thereby restore habitat for fish and wildlife.

It should also reduce toxics, pesticides, and other pollutants which are saturating our water ways.

In summary: the CalFED plan should not depend on concrete and earthen barriers which will be incredibly expensive, which will promote urban sprawl, and which will not solve any of our long term water problems.

Sincerely,

  
DelMar Janson
